PROFESSIONAL SUMMARY

Final-year Information Technology student at Vaal University of Technology with hands-on academic and project experience in software development, databases, web development and emerging technology. Skilled in Java, Python, JavaScript, PHP, Node.js, SQL, MySQL, HTML, CSS, Git and GitHub. Currently applying technical and problem-solving skills through a Business Analysis project involving the development of a Python-based AI solution. A motivated, adaptable team player seeking a graduate or junior technology opportunity where I can contribute to software solutions while continuing to develop my technical skills.

EDUCATION

Vaal University of Technology — Diploma in Information Technology | 2024–2026
Final year; expected completion: 2026
Relevant coursework: Database Management, Software Development, Web Development.
Programming languages studied: SQL, Java (including applets), JavaScript, HTML, PHP, Python, Node.js.

PROJECTS

Business Analysis Project — Python-Based AI Solution | 2026

- Applying business analysis, problem-solving and technology skills to the development of a Python-based AI solution.
- Applying analytical thinking and software development concepts throughout the project.
- Developing practical experience in connecting technology solutions with business needs.

Student Grade Calculator — Java | 2026

- Developed a Java application that accepts subject names and marks, calculates averages and determines pass/fail results for individual subjects.
- Applied programming and logical problem-solving skills to process numerical information and produce accurate results.
- Independently developed and published the application to GitHub.

Restaurant Website — HTML & CSS | May 2026

- Designed and developed a multi-page restaurant website featuring menu, reservations and experience pages.
- Applied web development principles to create structured and responsive page layouts.
- Published and hosted the website using GitHub Pages.

TECHNICAL SKILLS

Programming: Java (including applets), Python, JavaScript, PHP, Node.js
Web Development: HTML, CSS
Databases: SQL, MySQL
Cloud & Platforms: Microsoft Azure
Development Tools: Git, GitHub, JUnit
Technology Areas: Software Development, Database Management, Business Analysis, Artificial Intelligence, Cloud Technology

CERTIFICATIONS

Cisco Networking Academy — Introduction to Cybersecurity | June 2026

Forage — Deloitte — Data Analytics Job Simulation | Certificate of Completion | September 2026

- Completed practical data analysis tasks as part of the Deloitte job simulation.

PROFESSIONAL STRENGTHS

Problem Solving | Teamwork | Communication | Adaptability | Learning Agility | Attention to Detail
